Being born and raised in Bethel and the area, I find it amazing that one of the best kept secrets in our region is Yuut Elitnaurviat. With 80% of students from our region not attending a traditional college or university, it is time to look at alternative sources for post-secondary education. Many in the community are aware of the programs that we have had for some time: Commercial Driving, Healthcare, Welding, and Construction Trades just to name a few. What we are excited about this year is that we are hoping to open the Airframe and Power Plant School. It will be an 18 month program so that our students will leave with their Aircraft Mechanic's License and be able to work in a high wage job in the aviation industry. We were also recently awarded a grant from the U.S. Department of Education Alaska Native Education Program for a Licensed Practical Nurse (LPN) certificate program. This is another need in the local health field where students will be able to attend a year long course at Yuut to attain a LPN credential and enter a high paying job market with a local partner and employer. As we look back on the last 16 years to see if we have accomplished some of the visions that Senator Ted Stevens put forth for our organization, we believe that we have not only done so, but even gone a bit further.
